Dave and Nils,

Thank you for your prompt replies. I am a student at Brown University in Providence, RI, and myself and many students here have received broadcast email from one of your clients, connectU.com. While I am usually satisfied with being removed from a spammer's email list, the magnitude of this problem requires me to take further action. I will be gathering and compiling these emails from multiple people in the next few days and will send it all your way at that point.

Thank you for your cooperation.

-David Gornel

I may be able to help, but I need a little more info:

I have have been spammed by one of your customers and would like to take action.

What customer?

How should I go about this?

What action would you like to take?

Please note that I am extremely serious about following through on this and will take whatever action is necessary to

ensure that this customer is punished for having violated your AUP.

What is an 'AUP'?

Thanks,

Please send along the offending email and I will ensure you are removed from their mailing lists. My apologies for any inconvenience that may have been caused by one of our customers.
